

STOP & READ

Better Life Technology Products Stop & Read: Initially, the Garage Floor Protector will have curl marks due to being rolled on a core or folded in a box for shipment (this is normal).

Unroll option 1: For lay flat results, unroll Garage Floor Protector in the sunlight on a clean driveway. The warmer the conditions the quicker curls will straighten out and lay flat. Use wide push broom, push air out from center and work your way out (side to side and length to length) Repeat if necessary. Place on garage floor when desired and repeat broom out.

Unroll option 2: If you wish to unroll product directly on the garage floor, sweep garage floor clean of debris and unroll Garage Floor Protector. For best results, start unrolling process at the garage entrance; finishing at the back of the garage. Note: In cool to cold conditions it may take 72+ hours for most curl marks to lay flat depending on the temperature. Be sure to push out air with broom (It is OK to park your car on it during this time).

NOTE: For custom fit, allow product to relax in place before trimming around edges and corners. If you choose to tape down edges or seam between two floor protectors, we recommend using indoor-outdoor carpet tape.

Exterior use: If product is used under extreme heat, such as direct sunlight, the product may expand or contract a small amount after laying flat. For custom fit, allow product to relax in place before trimming around edges and corners.

The longer it sets, the better it will look.

Important Note: Many building materials expand and contract. This product is no exception.

CLEANING:

Use mild soap and water to loosen dirt and debris. Use broom or sponge squeegee for best results to remove excess water. Vinyl cleaners may be used to remove stubborn debris. Certain automotive vinyl cleaners may cause product to become slippery when wet. Use a vinyl cleaner made for walking areas such as floor wax.

CAUTION - SAFETY WARNING:

Wipe up any oil and chemicals from floor before rolling out product. Do not leave chemicals on product or wash into sewer system. Wipe up any oil or chemicals that may leak from vehicle and dispose of properly. Leaving some chemicals on the product for a long period of time may cause damage and can be hazardous to the environment.
